OUR VISION EDUCATION FOR SOCIAL CHANGE

Democratic Culture is not merely the Master's subject; it runs through all aspects of the educational process, from the online course and the offered educational material to the evaluation process. That is why there is special care for **accessibility**.

Education is the main pillar of shaping people's democratic consciousness, which is why Education in democratic citizenship and Education in Human Rights must begin as early as possible in people's lives and should continue throughout life.

“Education is a social process, education is progress. Education is not a preparation for life, but is life itself.”

John Dewey

**Our vision is to make Education an inclusive space, open to everyone with no discriminations.
This is the social change we aspire to make!**
